

AMENDMENTS

Specification Amendments

Please amend the specification as follows:

Substitute the paragraph starting at page 6, line 22, with the following:

Rendered content 226 includes a selectable data link 228 and various sections and/or frames. The selectable data link 228 can be a hyperlink, in the case of a Web page, or any other type of selectable connection that generates a request for content when selected by a user of the client device 206. The various sections of the rendered content 226 can include a browser header 230, a Web page header 232 (in the case of the rendered content being a Web page), a content section 234, a browser footer 236, and a navigation section 238. Although only one selectable data link 228 is shown in the content section 234, data links can be located within any of the rendered content sections, and particularly in the navigation section 238. In the case of a Web page, data links in navigation section 238 “navigate” a user of the client device 206 to other Web pages and/or Web sites.
